## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance  
(Applicant's argument filed on 05/14/2009 is persuasive):

Martinez (USPN. 4,646,274) discloses distortion in vibrator-type seismic records is corrected by measuring and using the actual ground force imparted by the source to develop an inverse filter. The ground force signal and the reflected seismic data are both subjected to the same deconvolution or other standard processing technique, thereby automatically filtering out flaws introduced by any such technique [see Martinez: Abstract; col. 2, line 55-col. 3, line 16; col. 4, lines 38-56].

Regarding claim 1, the closest prior art (Martinez) either singularly or in combination fails to anticipate or render obvious the combination wherein "after applying the first phase-control filter in (b), performing all subsequent processing steps on the phase-controlled seismic data, thereby transforming the seismic data into a version more representative of the subsurface region; and imaging physical structure of the subsurface region using the transformed seismic data" in combination with other limitations in the claims as defined by Applicant.

Claims 2-6 depend from allowed claim 1 and therefore are also allowed.

***Conclusion***

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
